-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 21 is rejected under 35 U.S.C. 101 because the claim is directed to a recording medium storing nonfunctional descriptive material.

Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical “things” nor statutory processes. See, e.g. Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. See MPEP 2106.IV.B.1.

Allowable Subject Matter

3. Claims 1-20 contain allowable subject matter over the prior art of record.
4. The following is a statement of reasons for the indication of allowable subject matter:

The claimed invention is directed to a file system for a device simultaneously recording/reproducing video on a storage medium. Some of the independent claims identify the feature of “determining an access unit which is a size of an access made to the storage unit for each video to be recorded/reproduced and recording the video in the access unit so that only video data of a same program is recorded in each management block set in the storage unit”. Moreover, some independent claims identify the feature of “determining an access unit which is a size of an access made to the storage unit for

each of the plurality of channels based on conditions for reading/writing data from/to the storage unit and reading/writing data by the access unit determined for each of the plurality of channels in an order of nearer processing time limits in response to a request to read/write data from the plurality of channels". The closest prior art, Park discloses a conventional video recording/reproducing apparatus in and from a randomly accessible storage medium, either singularly or in combination fails to identify or render the above underlined limitations obvious.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Park discloses a conventional video recording/reproducing apparatus in and from a randomly accessible storage medium.

Harada et al discloses a DMA transfer device capable of high-speed consecutive access to pages in a memory.

Venkatesh et al discloses storage and access of continuous media files indexed as lists of raid stripe sets associated with file names

Ando et al discloses an information storage medium and information recording/playback system.
